Client Age UK

Refurbishment & New Build

Architect Jane Darbyshire & David Kendall Limited

This project was carried out for our client, Age UK Northumberland. Internally, the building is subdivided into a mix of offices and training rooms that help provide community facilities to older people close to Ashington.

Extensive external car parking was also provided to the rear of the building.

The building consisted of the construction of a steel frame extension, enveloped with a mixture of facing blockwork, cedar cladding and curtain walling.
