PRB Consulting

The project involved a substantial refurbishment of the existing ground floor office/restaurant space. A major remodel of the space to incorporate new office welfare and state of the art gymnasium, complete with all associated M&E finishes.

External repairs and refurbishment were also undertaken to the glazed area surrounded by the lake.

Great care was needed regarding safety and the environment to ensure no contamination to the watercourse.

It should be noted that the works were carried out within a live environment, completed on time and within budget.
