

# The Arches- Barn Conversion

**Client**

**Mr J Boon**

**Architect**

**Gilmore Harris Associates**

**Structural Designers**

**BDN Limited**

This barn conversion involved a very extensive re-build under strict planning conditions. A high proportion of temporary structural support works was required prior to the commencement of demolition.

Whilst a sympathetic approach has been adopted in terms of traditional materials for the building it benefits from 21<sup>st</sup> century technology in the form of a ground source heat pump and underfloor heating.

This barn conversion was finished to the highest standards blending seamlessly with its surroundings.
